Since Issued Total CPR

\[
\text{TOTAL CPR} = 1 - \left( \frac{\text{APB}}{\text{PPB}} \right)^{\frac{12}{\text{MSC}}}
\]

APB = Actual period-end Pool Balance
PPB = Projected period-end Pool Balance assuming no prepayments and no defaults
Pool Balance = \text{Sum(Principal Balance + Interest Accrued to Capitalize Balance)}
MSC = Months Since Cut-Off

Since-Issued Total Constant Prepayment Rate (CPR)
Since-Issued Total CPR measures prepayments, both voluntary and involuntary, for a trust student loan pool over the life of a transaction. For each trust distribution, the actual month-end pool balance is compared against a month-end pool balance originally projected at issuance assuming no prepayments and defaults. For purposes of Since-Issued Total CPR calculations, projected period end pool balance assumes in-school status loans have up to a six month grace period before moving to repayment, grace status loans remain in grace status until their status end date and then to move to full principal and interest repayment, loans subject to interim interest or fixed payments during their in-school and grace period continue paying interim interest or fixed payments until full
